Good morning,

As a vendor for Automotive Lift repair in Airdrie, I was scheduled to visit the business every month. During each of my visits, I could smell an overwhelming scent of ammonia permeating through the walls into the bay and office area. I had to limit my time for each visit due to feeling sick, getting head aches and overall feeling of nausea. This occurred during every once of my monthly visits throughout the years the Doggy daycare was in business. In addition, I would experience watering eyes and a prolonged cough. Overall, it was an unpleasant experience for every one of my visits regardless of the time of year.

Regards,

Frank.
