To Whom it may concern,

I am a longstanding customer of Automotive Lift Repair in Airdrie located at Bay 3, 69 East Lake Crescent Airdrie. Each and every time I would attend this facility I was on the verge of becoming ill from the foul smell from the adjacent business. This business was an illegal facility housing a large volume of dogs who would urinate, defecate continually bark within the building. I would have to immediately shower upon leaving the premises and have my clothes drycleaned each time. Being an Airdrie taxpayer I am thoroughly disgusted on the lack of cooperation from the City of Airdrie to terminate this business in conjunction with the efforts of the SPCA of Alberta. Consequently, I refused to go to this facility and I am certain other customers would have taken the same position. The City of Airdrie should support small business during these challenging economic times not create further roadblocks and perpetuate harsh working conditions. Lastly, I must say that I would maybe see this type of conduct in a third world country; however, this is Canada and to have the personnel at Automotive Lift Repair work under these brutal conditions is unacceptable in my view.

Respectfully,

F. Farkas
